3D Kitchen

Fast, easy to operate software with seamless links for Design, costing, cutting and CNC manufacturing.

Customised for you and your business

We take the time to individually customise the program to suit your manufacturing process, and you can modify the program yourself to suit your individual needs.

Backed By 12 Months Free Technical Support

All 3D Kitchen programs are backed by your agent and 3D Kitchen head office, providing support for your business when you need it.

No Ongoing Licensing Fees

The program is yours to keep with no ongoing licensing fees or hidden costs.

Pro Design

Fast and easy design

3D Kitchen Pro Design gives you fast and accurate design capabilities for all your cabinetry projects, right through to sales and production. You'll have instant access to realistic 3D full motion images with lighting and shading, 2D elevations, detailed floor, kick and bench plans...all at the click of a button.

Enhance the customer approval process with clear visual 3d design output. Create accurate project plans with 3D Kitchen multi-page PDF creator, and streamline production with detailed plans for quoting and ordering.

Pro Custom

One step further

3D Kitchen Pro Custom includes all the features of Pro Design with the addition of comprehensive costing and production reporting.

Design your project and just minutes later produce multiple detailed reports including job costing, quotes, accessories, labour, hardware, material, panel saw optimisation and cutting lists.

Pro ToolPath

The complete package

Maximise your production from design to CNC Manufacturing.
3D Kitchen Pro ToolPath includes all the features of Pro Design and Pro Custom, and more.

Pro ToolPath enables communication between your design and your CNC machinery, automatically producing accurate cutting, shaping and drilling details.

Costing and Production Reports
### [Pro Custom & Pro ToolPath]

The software is pre-programmed to include all the necessary hardware products required for each job, including board material quantity, hinges, drawer runners, screws, PVC edges and more. Nothing is missed.

The labour content is broken into cutting, edging, assembly and installation. Generate accurate labour content for each job. For rapid and accurate quoting, you can price your design to include materials, hardware, accessories and labour.

Nesting
[Pro ToolPath]

3D Kitchen Pro ToolPath produces accurate drilling and routing positions with "True Shape" nesting to optimise material yield. This includes cabinet numbering for labels, floor plan and cutting lists layouts for easy part identification.

Powerful Parametric Processing

[Pro ToolPath]

Automatically manages scaling and shaping of all parts. Quickly and easily modify any operation such as cabinet sizes, routing, drilling position and cut outs. 3D Kitchen Pro ToolPath includes an option for mortise and tenon construction. View your output cabinet by cabinet, panel by panel.

No Ongoing Licensing Fees
The program is yours to keep with no ongoing licensing fees or hidden costs.
